

RAGHAV GANGWAR

+91-7668641048 | raghavgangwar222@gmail.com | linkedin.com/in/raghav-gangwar21 | github.com/SheinRG

Summary

Full-stack engineer with proven expertise in building **production grade web applications**. Experienced in **end to end ownership** from system design and database optimization to cloud deployment. Proficient in **React, Node.js, FastAPI**, REST API design, and cloud infrastructure. Demonstrated ability to ship features that directly impact users, collaborate cross-functionally, and solve complex technical problems in **fast moving startup environments**.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, HTML, CSS

Full-Stack & AI: React.js, Next.js, Node.js, Express.js, FastAPI | OpenAI API, Groq API, Claude API, LLM integration, Prompt Engineering

Automation & APIs: REST API design, Webhooks, JWT Auth, Integration architecture, n8n, Zapier

Databases & Data: MongoDB, SQL, ChromaDB, pgvector, NoSQL, Schema design

Cloud & DevOps: AWS (S3, EC2), Docker, GitHub Actions, Vercel, Render, Supabase, Git, Linux/Unix

Experience

EazyDiner

December 2025 – February 2026

Full Stack Engineer Intern

Remote

- Architected and developed **RESTful API endpoints** for restaurant and order management systems using Node.js and Express.js; designed scalable database schemas in MongoDB and optimized query performance through indexing, **reducing API latency by ~30%** in production.
- Built responsive frontend components with React.js and Tailwind CSS for **customer-facing dashboard**; ensured seamless data flow between frontend and backend through well-defined API contracts and error handling.
- Owned features **end to end** from requirements gathering to production deployment collaborated with product and frontend teams to translate business requirements into technical solutions and participated in **system design discussions**.

Medulance

June 2025 – August 2025

Full Stack Developer Intern

Remote

- Developed **RESTful APIs** and database schemas using Node.js, Express.js, and MongoDB for healthcare application features, ensuring robust data persistence and API reliability.
- Built responsive UI with React.js and Tailwind CSS, implemented **secure user authentication** using JWT tokens and bcrypt hashing for session management.
- Collaborated with **cross functional teams** to validate technical requirements and ensure code quality through reviews and best practices documentation.

Projects

Agentic Interview Coach | React.js, Node.js, Groq API, ElevenLabs, Web Speech API, Mongoose

2026

- Built an **AI-powered interview platform** that integrates multiple LLM APIs and voice synthesis; architected **low latency voice to voice interaction** using Groq's Whisper large v3 for speech recognition and ElevenLabs and Microsoft Edge TTS for natural voice synthesis.
- Leveraged **Llama 3.2 Vision models** to analyze resume images and webcam snapshots for non verbal cues, designed an analysis pipeline using Llama 3.1 to evaluate interview transcripts with **STAR method feedback**, automated filler word detection, and model answer generation.
- Deployed as a full stack application on Vercel; took complete ownership of architecture, **LLM integration**, and production reliability ensuring consistent API responses and handling **multi step LLM workflows**.

RAG Document Intelligence Platform | FastAPI, React.js, Groq API, LangChain, Docker

2026

- Engineered a **production grade RAG system** with end to end ownership built PDF ingestion pipelines using LangChain, implemented **semantic chunking**, integrated vector embeddings with ChromaDB, and designed **sub second semantic search** across thousands of documents.
- Architected a multi layered FastAPI backend with **PostgreSQL metadata tracking**, JWT authentication, per-user document isolation, and rate limiting; deployed on Render with **Docker containerization** and Supabase storage for concurrent multi user workloads.
- Integrated Groq API (LLaMA 3) as the LLM reasoning layer with precision-engineered prompts, implemented **streaming SSE responses** to **reduce latency by ~60%** and ensure hallucination-free outputs.

Education

Amity University Rajasthan

Jaipur, India

Bachelor of Technology in Computer Science & Engineering

Aug 2023 – June 2027

- Pre-Final Year | Expected Graduation: 2027 | **Current CGPA: 7.56**
- Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems, Software Engineering
